Hospitality Executive Dashboard

Full Business & Technical Specification

Power BI Dashboard Kit — Enterprise Grade

Hotels · Boutique · Luxury · Glamping · Zimmer · Multi-Property Chains

Version 2.0 | hellodeeply.com | info@hellodeeply.com

10	170+	12	6
Dashboard Screens	DAX Measures	Source Systems	User Roles

1. Executive Overview

The DEEPLY Hospitality Executive Dashboard is a fully integrated Power BI intelligence layer for the hospitality sector. It unifies data from every operational system into a single management cockpit that connects commercial performance, profitability, operations, people, and sustainability into one coherent view.

1.1 The Guiding Principle

Data → Insight → Financial Impact → Recommended Action

The dashboard is not another BI report. It is a management control layer that enables fast, data-driven, cross-departmental decision-making — available in Hebrew and English.

1.2 Vision Statement

"Build for DEEPLY an advanced hospitality dashboard product at Enterprise level that looks and functions as a strategic management system — not a collection of reports." Every screen answers one management question. Every KPI explains the why. Every anomaly leads to an action.

1.3 Scope — Property Types Supported

Property Type	Active Screens	Key Differentiators
Boutique Hotel (10–80 rooms)	1,2,3,4,5,6,8,10	ADR premium, direct booking %, guest NPS
Mid-Scale Hotel (80–250 rooms)	All 10 screens	Full operational + F&B + HR scheduling
Luxury / Resort (250+ rooms)	All 10 + Spa overlay	MICE, multi-currency, TRevPAR focus
Zimmer / B&B (2–20 units)	1,2,3,4,5	Unit occupancy, platform mix, lead time
Glamping / Eco Resort	1,2,3,4,5,9	Experience revenue, ESG, seasonality
Multi-Property Chain	All 10 + Portfolio view	Cross-property RLS, regional rollup, benchmarking

2. User Personas & Access Matrix

2.1 Persona Definitions

Role	Core Question	Key Metrics	Primary Screens
CEO / Owner	Am I hitting EBITDA targets? Where is money being lost?	Revenue, EBITDA, Occupancy, GOP Margin	Executive Command Center, P&L
CFO / Finance Director	Cash position, forecast accuracy, AR aging, CapEx vs plan?	Cash, AR/AP, Budget Variance, Net Profit	Finance & Cash, P&L
COO / General Manager	Daily flash — occupancy, RevPAR, complaints, staff issues?	RevPAR, Occupancy, NPS, SLA compliance	Executive, Revenue, Operations
Revenue Manager	Rate calendar, pickup, channel mix, pace vs LY?	ADR, Pace, Cancellation %, Net ADR	Commercial & Revenue, Channels
CHRO / HR Director	Turnover risk, scheduling gaps, payroll vs budget?	Turnover, Absenteeism, Labor Cost %	Workforce & HR
Procurement Manager	Spend variance, supplier performance, inventory days?	OTIF, Spend Variance, Stockout Rate	Procurement & Inventory
Energy / Sustainability	kWh per occupied room, carbon, ESG targets?	Energy Cost, kWh/Room, Waste %	Energy & Sustainability

3. Design Principles & Brand System

3.1 Deeply Brand DNA

The Deeply logo communicates: depth, trust, technology, precision, enterprise premium. Every design decision must reinforce these values.

3.2 Color System

Role	Color	Hex	Usage
Primary	Deep Navy	*#0A1628*	Headers, key text, navigation
Secondary	Royal Blue	*#1A4A8A*	Section headers, active states
Accent	Sky Blue	*#4DB2EC*	Highlights, links, KPI positive
Background	Off White	*#F8FAFC*	Page backgrounds
Surface	Pale Blue	*#EBF5FB*	Card fills, table alternates
Success	Green	*#1E8449*	On-target, positive variance
Warning	Amber	*#B7770D*	Near-threshold, watch
Danger	Red	*#C0392B*	Off-target, alert, anomaly
Neutral	Dark Gray	*#2C3E50*	Body text, secondary labels

3.3 UX Principles

- Each screen answers exactly ONE management question
- Every KPI must show: current value + vs budget + vs LY + trend direction
- Every anomaly must lead to a defined action or owner
- Full visual consistency across all 10 screens — same header, footer, slicer position
- Mobile-first layout: KPI cards stack vertically on Power BI Mobile
- RTL Hebrew + LTR English toggle available on all screens

4. KPI Framework — Six Measurement Layers

Layer 1 — Core Business Metrics

Financial Performance	Revenue	Profitability
Total Revenue Net Revenue Revenue Growth % Cash Balance Working Capital	Total Expenses Expense Ratio % Department Expenses Payroll % Utility Cost %	Gross Profit Operating Profit GOP / EBITDA Net Profit Margin % Budget Variance

Layer 2 — Classic Hospitality KPIs

Occupancy	Rate	Revenue	Booking
Occupancy % OOO Rooms Available Rooms	ADR Net ADR RevPAR TRevPAR GOPPAR	Rooms Revenue F&B Revenue Ancillary Revenue Upsell Revenue	Booking Pace Pickup (7/14/30d) Cancellation % No-show % Booking Window ALOS

Layer 3 — Guest Retention & Customer Economics

- Repeat Guest Rate | Retention Rate | Churn Rate (Guest / Corporate / Loyalty)
- LTV (Gross and Net) — accounting for frequency, ADR, ancillary spend, discounts, CAC
- CAC (Cost of Acquisition) by channel | LTV/CAC Ratio
- NPS / Guest Satisfaction Score | Review Score (Booking.com / TripAdvisor / Google)

Layer 4 — Operational Efficiency

- Check-in wait time | Check-out efficiency | Room ready on time %
- Housekeeping productivity | Room turnaround time
- Maintenance SLA compliance % | Out-of-order rooms | Resolution time
- Complaint rate per 100 rooms | First-response time

Layer 5 — Workforce & HR

- Headcount | FTE vs Budget | Turnover % | Absenteeism %
- Labor Cost % of Revenue | Payroll variance | Overtime %
- Revenue per Employee | Occupied Rooms per Labor Hour
- Open Roles | Time to Hire | Training Completion %

Layer 6 — Energy, Utilities & Sustainability

- kWh per Occupied Room | Water Liters per Occupied Room
- Energy Cost | Utility Cost % | Peak Demand
- Carbon Footprint (tCO2e) | Waste per Guest | Savings Realized
- Laundry Cost per Occupied Room | Renewable Energy %

5. Dashboard Screens — Full Specification

Screen 1 — Executive Command Center

Audience	CEO, Owner, Board, GM
Core Question	What is the state of the business right now? Are we on plan? What is hurting profit?
KPIs	Total Revenue | Net Revenue | GOP/EBITDA | Occupancy | ADR | RevPAR | Cash Position | Payroll % | Guest NPS | Repeat Guest Rate | TRevPAR | Profit Margin %
Visualizations	6× KPI Score Cards (conditional color) | Revenue/Expenses/Profit Combo Trend (12 months) | Waterfall: Revenue Bridge vs LY | Heatmap: Property/Dept performance matrix | Top 3 Alerts Panel | AI Smart Narrative
Power BI Features	Bookmark: Board Pack Mode | PDF Export one-click | Drill-through to any detail screen | Smart Narrative auto-summary | Decomposition Tree on any KPI

Screen 2 — Commercial & Revenue

Audience	Revenue Manager, GM, COO
Core Question	What is our rate and occupancy mix? Where is revenue coming from and what is the true net contribution?
KPIs	Occupancy % | ADR | Net ADR | RevPAR | TRevPAR | GOPPAR | Booking Pace | Pickup (7/14/30d) | Cancellation % | No-show % | ALOS | Booking Window | Upsell Revenue | Direct Mix % | OTA Mix %
Visualizations	Rate Calendar Heatmap (ADR by date) | Pace Curve (current vs LY) | Occupancy vs ADR Scatter (price elasticity) | Gross-to-Net Revenue Bridge (Waterfall) | Revenue Mix by Segment (Donut) | Cancellation Trend (Line)
Power BI Features	Rate Calendar click → date detail | Pickup snapshot comparison (today vs yesterday) | STR Benchmark overlay | AI 90-day Revenue Forecast with confidence bands

Screen 3 — Sales, Marketing & Channels

Audience	CMO, Revenue Manager
Core Question	Which channels are truly profitable? What is our real CAC and LTV? Where should we invest more?
KPIs	Website Conversion Rate | Direct Booking % | CAC by channel | ROAS | Net Revenue by Channel | LTV (Gross & Net) | LTV/CAC Ratio | Repeat Booking Rate | Loyalty Active Rate | OTA Commission Cost

Visualizations	Sankey: Booking Source → Channel → Revenue | Funnel: Web Visit → Search → Book → Arrive → Return | CAC vs LTV Scatter by channel | ROAS by Campaign | Repeat Guest Cohort | Channel Profitability Waterfall
Power BI Features	True Net Revenue per Channel (after CAC + commission) | Campaign ROI via GA4 UTM integration | Booking Window Heatmap | OTA parity monitor alert

Screen 4 — Operations & Guest Experience

Audience	COO, GM, Guest Relations
Core Question	How well are we executing operationally? What are guests experiencing and where are we failing?
KPIs	Check-in Wait Time | Rooms Ready on Time % | Housekeeping Productivity | Maintenance SLA % | OOO Rooms | Complaint Rate per 100 rooms | Resolution Time | Review Score (all platforms) | NPS | Department Satisfaction
Visualizations	SLA Compliance Board | Pareto Chart: Top complaint categories | Room Status Heatmap (hourly) | Guest Issue Trend (line) | Department Performance Matrix | Word Cloud: review sentiment
Power BI Features	AI Sentiment Classification of reviews | Spike Alert on score drop | Benchmark vs Comp Set (TrustYou/Revinate) | Drill-through to individual review or work order

Screen 5 — Finance & Cash

Audience	CFO, Finance Team
Core Question	What is our cash position? Are we collecting on time? Where are we over/under budget?
KPIs	Cash Balance | Operating Cash Flow | AR Balance + DSO | AP Balance + DPO | Collection Rate | Refunds Outstanding | Budget Variance (₪ and %) | CapEx vs Plan | Forecast Accuracy
Visualizations	Cash Waterfall (Operating/Investing/Financing) | AR Aging Matrix (0-30/31-60/61-90/90+ days) | Collections Trend | 90-day Cash Forecast with AI confidence band | Expense Variance Analysis by GL code
Power BI Features	Live bank feed integration (API) | Covenant Monitor with threshold alerts | FX Exposure sensitivity slider | Scenario: RevPAR -10% → cash runway impact

Screen 6 — Profitability & P&L

Audience	CFO, Owner, GM
Core Question	What is our true EBITDA? Which departments are profitable? Where is margin being eroded?
KPIs	Gross Profit | Operating Profit | GOP | EBITDA | Net Profit | Profit Margin % | Department Margin | Payroll % | Utility Cost % | Cost of Sales %
Visualizations	Full USALI P&L Matrix (rows × 12 months, color-coded vs budget) | Revenue-to-EBITDA Waterfall | Margin Trend (24 months) | Property Ranking by Profit | Budget vs Actual Variance by GL
Power BI Features	USALI-mapped Chart of Accounts | Department P&L drill-through | AI variance commentary on top 3 variances | Rolling 3-month forecast update

Screen 7 — Procurement & Inventory

Audience	Purchasing Manager, CFO
Core Question	Are we overspending on procurement? Which suppliers are underperforming? Where is waste occurring?
KPIs	Total Spend | Spend Variance | Purchase Price Variance | Inventory Days | Waste % | Stockout Rate | Supplier OTIF | Emergency Purchases % | Maverick Spend % | Contract Compliance %
Visualizations	Treemap: Spend by Category | Vendor Scorecard (Delivery × Quality × Price composite) | Inventory Heatmap by SKU | Waste Trend | SKU Price Trend vs contract | Spend Cube drill Category → Vendor → Invoice
Power BI Features	Contract Expiry Calendar alerts | Price Benchmark vs commodity index | Preferred Vendor compliance flag | Drill-through: click vendor → full scorecard + invoice history

Screen 8 — Workforce & HR

Audience	CHRO, HR Team, GM
Core Question	Are our people costs sustainable? Where is turnover happening? Are we properly staffed?
KPIs	Headcount | Labor Cost | Payroll % Revenue | Revenue per Employee | Occupied Rooms per Labor Hour | Turnover % | Absenteeism % | Overtime % | Open Roles | Time to Hire | Training Completion %
Visualizations	Headcount Trend by Department | Attrition Heatmap (dept × month) | Productivity vs Labor Cost Scatter | Scheduling Coverage Heatmap (shift × day) | Hiring Funnel | Payroll Waterfall (Budget → Overtime → Actuals)

Power BI Features	Flight Risk Model: AI flags at-risk employees | Scheduling Gap Alerts | Training Compliance deadline tracker | eNPS pulse survey integration

Screen 9 — Energy, Utilities & Sustainability

Audience	Sustainability Officer, GM, Maintenance
Core Question	How efficient is our energy use? Where are anomalies? What is our ESG performance?
KPIs	Energy Cost | kWh per Occupied Room | Water per Occupied Room | Utility Cost % | Peak Demand | Waste per Guest | Laundry Cost per Occ Room | Carbon Footprint (tCO2e) | Renewable Energy % | Green Score
Visualizations	Utility Trend (24 months) + benchmark | Baseline vs Actual Usage | Consumption Heatmap (hour × day) | Property Comparison | Anomaly Panel | Carbon Breakdown (Scope 1/2/3) | Energy Source Mix Donut
Power BI Features	IoT/BMS integration: hourly meter data per zone | AI anomaly detection (>20% baseline spike) | ESG Board Report PDF export | Solar generation monitor

Screen 10 — Portfolio, Benchmark & Forecast

Audience	Owner, CEO, Regional Managers
Core Question	How do our properties compare? Which are leading, which are lagging? What does the forecast show?
KPIs	Property Rank | Revenue Index | RevPAR Index | TRevPAR | GOPPAR | Budget Attainment % | Forecast Accuracy | Risk Score | Health Score | Net Margin by Property
Visualizations	Portfolio Ranking Table (sortable by any KPI) | Map Visual: properties by RevPAR performance | Small Multiples: all KPIs per property | 90-day Forecast Cone | Benchmark Scatter (vs STR comp set) | Comparative Heatmap
Power BI Features	Cross-property RLS: regional manager sees only their cluster | STR/OTA Insight API benchmark | Scenario: what-if RevPAR +5% across portfolio → EBITDA impact | Forecast export to Excel for Board Pack

6. Data Model — Full Schema

The model follows a Star Schema pattern. All Fact tables connect exclusively to Dimension tables. No direct Fact-to-Fact relationships. Role-playing dimensions are implemented via inactive relationships activated with USERELATIONSHIP() in DAX.

Key Conventions:
PK = Primary Key (surrogate integer, never exposed to end users)
FK = Foreign Key referencing a Dimension table
NK = Natural / Business Key (from source system)
All date columns store as DATE or DATETIME, never VARCHAR
All monetary columns: DECIMAL(18,4) in base currency
NULL = allowed only where value genuinely may not exist

6.1 Fact Tables

Fact_Reservations

Column Name	Data Type	Nullable	Key	Description
ReservationID	*INT*	NOT NULL	**PK**	Surrogate primary key
ReservationNK	*NVARCHAR(50)*	NOT NULL	NK	PMS reservation number
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Which property
RoomID	*INT*	NULL	**FK → Dim_Room**	Assigned room (null until check-in)
GuestID	*INT*	NOT NULL	**FK → Dim_Guest**	Anonymized guest reference
ChannelID	*INT*	NOT NULL	**FK → Dim_Channel**	Booking channel (OTA/Direct/GDS)
SegmentID	*INT*	NOT NULL	**FK → Dim_Segment**	Market segment (Leisure/Corp/Group)
ArrivalDateID	*INT*	NOT NULL	**FK → Dim_Date**	Arrival date key
DepartureDateID	*INT*	NOT NULL	**FK → Dim_Date**	Departure date key (inactive rel.)
BookingDateID	*INT*	NOT NULL	**FK → Dim_Date**	Date reservation was made (inactive)
RoomNights	*SMALLINT*	NOT NULL	—	Total nights booked
Adults	*TINYINT*	NOT NULL	—	Number of adult guests

Column Name	Data Type	Nullable	Key	Description
Children	*TINYINT*	NOT NULL	—	Number of children
RateCode	*NVARCHAR(20)*	NOT NULL	—	Rate plan applied (BAR/Corporate/etc.)
GrossRevenue	*DECIMAL(18,4)*	NOT NULL	—	Revenue before commissions/discounts
NetRevenue	*DECIMAL(18,4)*	NOT NULL	—	Revenue after channel commission
Commission	*DECIMAL(18,4)*	NULL	—	OTA/agent commission paid
DiscountAmount	*DECIMAL(18,4)*	NULL	—	Promotional discounts applied
UpsellRevenue	*DECIMAL(18,4)*	NULL	—	Upsell add-ons (breakfast/parking/etc.)
Status	*NVARCHAR(20)*	NOT NULL	—	Confirmed/In-House/Checked-Out/Cancelled/No-Show
CancellationDateID	*INT*	NULL	**FK → Dim_Date**	Date cancelled (null if not cancelled)
LeadTimeDays	*SMALLINT*	NULL	—	Days between booking and arrival
LoyaltyTier	*NVARCHAR(20)*	NULL	—	Guest loyalty tier at time of booking
CurrencyCode	*CHAR(3)*	NOT NULL	—	ISO 4217 currency of transaction
ETLLoadDate	*DATETIME*	NOT NULL	—	Row insertion timestamp from ETL

Fact_Revenue

Column Name	Data Type	Nullable	Key	Description
RevenueID	*INT*	NOT NULL	**PK**	Surrogate primary key
DateID	*INT*	NOT NULL	**FK → Dim_Date**	Revenue date key
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Property
OutletID	*INT*	NOT NULL	**FK → Dim_Outlet**	Revenue outlet (Rooms/F&B/Spa/Parking)
DepartmentID	*INT*	NOT NULL	**FK → Dim_Department**	Operational department

Column Name	Data Type	Nullable	Key	Description
GrossRevenue	*DECIMAL(18,4)*	NOT NULL	—	Gross revenue before deductions
NetRevenue	*DECIMAL(18,4)*	NOT NULL	—	Net after commissions and discounts
TaxAmount	*DECIMAL(18,4)*	NULL	—	VAT/tax collected
Covers	*INT*	NULL	—	F&B covers (null for non-F&B)
Transactions	*INT*	NULL	—	Number of POS transactions
CurrencyCode	*CHAR(3)*	NOT NULL	—	Transaction currency
SourceSystem	*NVARCHAR(30)*	NOT NULL	—	PMS / POS / Booking Engine

Fact_Expenses

Column Name	Data Type	Nullable	Key	Description
ExpenseID	*INT*	NOT NULL	**PK**	Surrogate primary key
DateID	*INT*	NOT NULL	**FK → Dim_Date**	Expense posting date
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Property incurring expense
DepartmentID	*INT*	NOT NULL	**FK → Dim_Department**	Responsible department
AccountID	*INT*	NOT NULL	**FK → Dim_Account**	GL account (USALI-mapped)
VendorID	*INT*	NULL	**FK → Dim_Supplier**	Supplier (for procurement expenses)
Amount	*DECIMAL(18,4)*	NOT NULL	—	Expense amount in base currency
BudgetAmount	*DECIMAL(18,4)*	NULL	—	Approved budget for this period/GL
ExpenseCategory	*NVARCHAR(50)*	NOT NULL	—	Payroll/COGS/Energy/Maintenance/Marketing
InvoiceNumber	*NVARCHAR(50)*	NULL	—	Supplier invoice reference
ApprovalStatus	*NVARCHAR(20)*	NOT NULL	—	Approved/Pending/Rejected

Column Name	Data Type	Nullable	Key	Description
IsCapex	*BIT*	NOT NULL	—	1 = Capital expenditure, 0 = OpEx

Fact_Payroll

Column Name	Data Type	Nullable	Key	Description
PayrollID	*INT*	NOT NULL	**PK**	Surrogate primary key
DateID	*INT*	NOT NULL	**FK → Dim_Date**	Pay period end date
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Property
EmployeeID	*INT*	NOT NULL	**FK → Dim_Employee**	Employee reference
DepartmentID	*INT*	NOT NULL	**FK → Dim_Department**	Department at time of payment
BaseSalary	*DECIMAL(18,4)*	NOT NULL	—	Regular base pay
OvertimePay	*DECIMAL(18,4)*	NULL	—	Overtime additional pay
Bonus	*DECIMAL(18,4)*	NULL	—	Bonus payments (restricted access)
Benefits	*DECIMAL(18,4)*	NULL	—	Employer benefit contributions
TotalCost	*DECIMAL(18,4)*	NOT NULL	—	Total employer cost (salary+OT+benefits)
RegularHours	*DECIMAL(8,2)*	NOT NULL	—	Regular hours worked in period
OvertimeHours	*DECIMAL(8,2)*	NULL	—	Overtime hours worked
AbsentDays	*TINYINT*	NULL	—	Unplanned absence days in period
IsActive	*BIT*	NOT NULL	—	1 = currently employed

Fact_GL

Column Name	Data Type	Nullable	Key	Description
GLID	*INT*	NOT NULL	**PK**	Surrogate primary key
DateID	*INT*	NOT NULL	**FK → Dim_Date**	GL posting date

Column Name	Data Type	Nullable	Key	Description
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Property entity
AccountID	*INT*	NOT NULL	**FK → Dim_Account**	Chart of accounts line
DepartmentID	*INT*	NOT NULL	**FK → Dim_Department**	Cost center
DebitAmount	*DECIMAL(18,4)*	NULL	—	Debit amount
CreditAmount	*DECIMAL(18,4)*	NULL	—	Credit amount
NetAmount	*DECIMAL(18,4)*	NOT NULL	—	Net (Debit - Credit)
JournalReference	*NVARCHAR(50)*	NULL	—	Journal entry reference number
Description	*NVARCHAR(200)*	NULL	—	Transaction description
PeriodYear	*SMALLINT*	NOT NULL	—	Fiscal year
PeriodMonth	*TINYINT*	NOT NULL	—	Fiscal month (1-12)

Fact_Energy

Column Name	Data Type	Nullable	Key	Description
EnergyID	*INT*	NOT NULL	**PK**	Surrogate primary key
DateID	*INT*	NOT NULL	**FK → Dim_Date**	Reading date
HourOfDay	*TINYINT*	NOT NULL	—	Hour 0-23 (for IoT hourly data)
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Property
MeterID	*INT*	NOT NULL	**FK → Dim_Meter**	Specific meter/zone
Electricity_kWh	*DECIMAL(10,4)*	NULL	—	Electricity consumed in kWh
Water_Liters	*DECIMAL(12,2)*	NULL	—	Water consumed in liters
Gas_m3	*DECIMAL(10,4)*	NULL	—	Natural gas in cubic meters

Column Name	Data Type	Nullable	Key	Description
ElectricityCost	*DECIMAL(18,4)*	NULL	—	Cost of electricity for period
WaterCost	*DECIMAL(18,4)*	NULL	—	Cost of water for period
GasCost	*DECIMAL(18,4)*	NULL	—	Cost of gas for period
IsAnomaly	*BIT*	NOT NULL	—	1 = AI-flagged consumption anomaly
BaselineElectricity_kWh	*DECIMAL(10,4)*	NULL	—	Expected consumption for period

Fact_GuestFeedback

Column Name	Data Type	Nullable	Key	Description
FeedbackID	*INT*	NOT NULL	**PK**	Surrogate primary key
DateID	*INT*	NOT NULL	**FK → Dim_Date**	Review/survey date
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Property reviewed
GuestID	*INT*	NULL	**FK → Dim_Guest**	Reviewer (null if anonymous)
Platform	*NVARCHAR(30)*	NOT NULL	—	Booking.com/TripAdvisor/Google/Internal
OverallScore	*DECIMAL(4,2)*	NOT NULL	—	Score (e.g. 8.4 out of 10)
CleanlinessScore	*DECIMAL(4,2)*	NULL	—	Cleanliness sub-score
ServiceScore	*DECIMAL(4,2)*	NULL	—	Staff/service sub-score
FacilitiesScore	*DECIMAL(4,2)*	NULL	—	Facilities sub-score
SentimentLabel	*NVARCHAR(20)*	NULL	—	AI: Positive/Neutral/Negative
TopicTags	*NVARCHAR(200)*	NULL	—	AI: comma-separated topics (WiFi,Breakfast...)
ReviewText	*NVARCHAR(MAX)*	NULL	—	Original review text (sanitized)
ManagerResponded	*BIT*	NOT NULL	—	1 = management replied
ResponseHours	*INT*	NULL	—	Hours taken to respond
IsNPS	*BIT*	NOT NULL	—	1 = internal NPS survey row

Column Name	Data Type	Nullable	Key	Description
NPSScore	*TINYINT*	NULL	—	0-10 NPS score (null if not NPS survey)

Fact_Budget

Column Name	Data Type	Nullable	Key	Description
BudgetID	*INT*	NOT NULL	**PK**	Surrogate primary key
DateID	*INT*	NOT NULL	**FK → Dim_Date**	Budget month (first day of month)
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Property
AccountID	*INT*	NOT NULL	**FK → Dim_Account**	GL account line
DepartmentID	*INT*	NOT NULL	**FK → Dim_Department**	Department
BudgetRevenue	*DECIMAL(18,4)*	NULL	—	Revenue target for period
BudgetExpense	*DECIMAL(18,4)*	NULL	—	Expense budget for period
BudgetOccupancy	*DECIMAL(5,4)*	NULL	—	Occupancy target (0.000-1.000)
BudgetADR	*DECIMAL(18,4)*	NULL	—	ADR target
BudgetHeadcount	*DECIMAL(8,2)*	NULL	—	FTE budget
FiscalYear	*SMALLINT*	NOT NULL	—	Budget fiscal year
BudgetVersion	*NVARCHAR(20)*	NOT NULL	—	Original/Reforecast1/Reforecast2

Fact_Procurement

Column Name	Data Type	Nullable	Key	Description
ProcurementID	*INT*	NOT NULL	**PK**	Surrogate primary key
OrderDateID	*INT*	NOT NULL	**FK → Dim_Date**	Purchase order date
DeliveryDateID	*INT*	NULL	**FK → Dim_Date**	Actual delivery date (inactive rel.)

Column Name	Data Type	Nullable	Key	Description
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Ordering property
SupplierID	*INT*	NOT NULL	**FK → Dim_Supplier**	Supplier
CategoryID	*INT*	NOT NULL	**FK → Dim_ProcurementCategory**	Spend category
POID	*NVARCHAR(50)*	NOT NULL	NK	Purchase order number
OrderedQuantity	*DECIMAL(12,4)*	NOT NULL	—	Quantity ordered
ReceivedQuantity	*DECIMAL(12,4)*	NULL	—	Quantity actually received
UnitCost	*DECIMAL(18,4)*	NOT NULL	—	Cost per unit at order time
ContractUnitCost	*DECIMAL(18,4)*	NULL	—	Agreed contract price per unit
TotalCost	*DECIMAL(18,4)*	NOT NULL	—	Total order value
PriceVariance	*DECIMAL(18,4)*	NULL	—	Actual vs contract price difference
IsOnTime	*BIT*	NULL	—	1 = delivered on/before promised date
IsEmergency	*BIT*	NOT NULL	—	1 = emergency/unplanned purchase
IsMaverick	*BIT*	NOT NULL	—	1 = non-preferred supplier purchase

6.2 Dimension Tables

Dim_Date

Column Name	Data Type	Nullable	Key	Description
DateID	*INT*	NOT NULL	**PK**	Surrogate key (YYYYMMDD format)
Date	*DATE*	NOT NULL	NK	Calendar date
Year	*SMALLINT*	NOT NULL	—	Calendar year
Quarter	*TINYINT*	NOT NULL	—	Quarter 1-4
Month	*TINYINT*	NOT NULL	—	Month 1-12

Column Name	Data Type	Nullable	Key	Description
MonthName	*NVARCHAR(20)*	NOT NULL	—	January / February / ...
MonthNameHE	*NVARCHAR(20)*	NOT NULL	—	ינואר / פברואר / ...
WeekOfYear	*TINYINT*	NOT NULL	—	ISO week number
DayOfWeek	*TINYINT*	NOT NULL	—	1=Sunday ... 7=Saturday (Israeli convention)
DayName	*NVARCHAR(15)*	NOT NULL	—	Monday / Tuesday / ...
IsWeekend	*BIT*	NOT NULL	—	1 = Friday or Saturday
IsHoliday	*BIT*	NOT NULL	—	1 = Israeli national holiday
HolidayName	*NVARCHAR(50)*	NULL	—	Holiday name if IsHoliday=1
Season	*NVARCHAR(20)*	NOT NULL	—	High/Shoulder/Low (property-defined)
FiscalYear	*SMALLINT*	NOT NULL	—	Fiscal year (may differ from calendar)
FiscalQuarter	*TINYINT*	NOT NULL	—	Fiscal quarter
FiscalMonth	*TINYINT*	NOT NULL	—	Fiscal month within fiscal year
IsLastDayOfMonth	*BIT*	NOT NULL	—	1 = last calendar day of month

Dim_Property

Column Name	Data Type	Nullable	Key	Description
PropertyID	*INT*	NOT NULL	**PK**	Surrogate key
PropertyNK	*NVARCHAR(20)*	NOT NULL	NK	Internal property code
PropertyName	*NVARCHAR(100)*	NOT NULL	—	Full property name
PropertyType	*NVARCHAR(30)*	NOT NULL	—	Hotel/Boutique/Glamping/Zimmer/Resort
StarRating	*TINYINT*	NULL	—	1-5 star classification
City	*NVARCHAR(50)*	NOT NULL	—	City
Region	*NVARCHAR(50)*	NULL	—	Region / district
Country	*CHAR(2)*	NOT NULL	—	ISO 2-letter country code

Column Name	Data Type	Nullable	Key	Description
Latitude	*DECIMAL(10,6)*	NULL	—	GPS latitude for map visual
Longitude	*DECIMAL(10,6)*	NULL	—	GPS longitude for map visual
TotalRooms	*SMALLINT*	NOT NULL	—	Total room inventory
OpenDate	*DATE*	NOT NULL	—	Property opening date
RegionalManagerID	*INT*	NULL	**FK → Dim_Employee**	Regional manager (for RLS)
GMEmail	*NVARCHAR(100)*	NULL	—	GM UPN for RLS filter
IsActive	*BIT*	NOT NULL	—	1 = currently operating
CurrencyCode	*CHAR(3)*	NOT NULL	—	Primary operating currency

Dim_Channel

Column Name	Data Type	Nullable	Key	Description
ChannelID	*INT*	NOT NULL	**PK**	Surrogate key
ChannelName	*NVARCHAR(50)*	NOT NULL	—	Booking.com / Expedia / Direct Web / GDS / Walk-in
ChannelType	*NVARCHAR(20)*	NOT NULL	—	OTA / Direct / GDS / Corporate / Phone
CommissionRate	*DECIMAL(5,4)*	NULL	—	Standard commission rate (e.g. 0.15 = 15%)
IsDirect	*BIT*	NOT NULL	—	1 = direct booking (no commission)
ParentChannel	*NVARCHAR(50)*	NULL	—	Parent group (Expedia Group / Booking Holdings)

Dim_Guest

Column Name	Data Type	Nullable	Key	Description
GuestID	*INT*	NOT NULL	**PK**	Anonymized surrogate key — no PII stored
GuestHashKey	*NVARCHAR(64)*	NOT NULL	NK	SHA-256 hash of source PMS guest ID
NationalityCode	*CHAR(2)*	NULL	—	ISO 2-letter nationality code

Column Name	Data Type	Nullable	Key	Description
SourceMarket	*NVARCHAR(50)*	NULL	—	Country/region of booking origin
AgeGroup	*NVARCHAR(20)*	NULL	—	Under25/25-34/35-44/45-54/55-64/65+
Segment	*NVARCHAR(30)*	NOT NULL	—	Leisure/Corporate/Group/Government
LoyaltyTier	*NVARCHAR(20)*	NULL	—	Bronze/Silver/Gold/Platinum
VisitCount	*SMALLINT*	NOT NULL	—	Total stays across all properties (updated nightly)
FirstStayDateID	*INT*	NULL	**FK → Dim_Date**	Date of first ever stay
LastStayDateID	*INT*	NULL	**FK → Dim_Date**	Date of most recent stay (inactive rel.)
TotalLifetimeRevenue	*DECIMAL(18,4)*	NULL	—	Gross lifetime revenue across all stays

Dim_Employee

Column Name	Data Type	Nullable	Key	Description
EmployeeID	*INT*	NOT NULL	**PK**	Surrogate key
EmployeeNK	*NVARCHAR(20)*	NOT NULL	NK	HR system employee number
PropertyID	*INT*	NOT NULL	**FK → Dim_Property**	Home property
DepartmentID	*INT*	NOT NULL	**FK → Dim_Department**	Department
Position	*NVARCHAR(50)*	NOT NULL	—	Job title
ContractType	*NVARCHAR(20)*	NOT NULL	—	Full-time/Part-time/Seasonal/Agency
SalaryBand	*NVARCHAR(10)*	NULL	—	A/B/C/D band (no actual salary here)
HireDate	*DATE*	NOT NULL	—	Employment start date
TerminationDate	*DATE*	NULL	—	Employment end date (null if active)
ManagerID	*INT*	NULL	**FK → Dim_Employee**	Direct manager (self-join)

Column Name	Data Type	Nullable	Key	Description
IsActive	*BIT*	NOT NULL	—	1 = currently employed
EmailUPN	*NVARCHAR(100)*	NULL	—	Azure AD UPN for RLS — HR role only

Dim_Supplier

Column Name	Data Type	Nullable	Key	Description
SupplierID	*INT*	NOT NULL	**PK**	Surrogate key
SupplierNK	*NVARCHAR(30)*	NOT NULL	NK	ERP vendor code
SupplierName	*NVARCHAR(100)*	NOT NULL	—	Supplier trading name
Category	*NVARCHAR(50)*	NOT NULL	—	Food/Linen/Maintenance/Technology/Energy
IsPreferred	*BIT*	NOT NULL	—	1 = on approved vendor list
ContractExpiry	*DATE*	NULL	—	Current contract expiry date
PaymentTermsDays	*TINYINT*	NULL	—	Standard payment terms in days
OTIF_Target	*DECIMAL(5,4)*	NULL	—	Agreed on-time-in-full target rate
Country	*CHAR(2)*	NULL	—	Supplier country
IsActive	*BIT*	NOT NULL	—	1 = active supplier

Dim_Department

Column Name	Data Type	Nullable	Key	Description
DepartmentID	*INT*	NOT NULL	**PK**	Surrogate key
DepartmentName	*NVARCHAR(50)*	NOT NULL	—	Rooms/F&B/Housekeeping/Maintenance/HR/Finance
DepartmentNameHE	*NVARCHAR(50)*	NULL	—	Hebrew name
USALICategory	*NVARCHAR(50)*	NULL	—	USALI mapping: Revenue/Departmental/Undistributed
IsRevenueDept	*BIT*	NOT NULL	—	1 = department generates direct revenue
ParentDeptID	*INT*	NULL	**FK → Dim_Department**	Parent department (self-join for hierarchy)

Dim_Account

Column Name	Data Type	Nullable	Key	Description
AccountID	*INT*	NOT NULL	**PK**	Surrogate key
GLCode	*NVARCHAR(20)*	NOT NULL	NK	General ledger account code
AccountName	*NVARCHAR(100)*	NOT NULL	—	Account description
AccountType	*NVARCHAR(20)*	NOT NULL	—	Revenue/Expense/Asset/Liability/Equity
USALILine	*NVARCHAR(50)*	NULL	—	USALI P&L line mapping
USALILevel	*NVARCHAR(30)*	NULL	—	Departmental/Undistributed/Fixed Charges
ExpenseCategory	*NVARCHAR(50)*	NULL	—	Payroll/COGS/Energy/Marketing/Admin
IsPayroll	*BIT*	NOT NULL	—	1 = payroll-related account
IsCapex	*BIT*	NOT NULL	—	1 = capital expenditure account

7. DAX Measures Library (Selected Core Measures)

All measures stored in a dedicated [Measures] table — never inside Fact tables. Full library contains 170+ measures; key measures shown by domain.

7.1 Revenue Measures

Measure	DAX Formula	Notes
Total Revenue	`SUM(Fact_Revenue[GrossRevenue])`	All outlets, all properties
Net Revenue	`SUM(Fact_Revenue[NetRevenue])`	After commissions & discounts
RevPAR	`DIVIDE([Rooms Revenue],[Available Room Nights])`	Core hotel KPI
ADR	`DIVIDE([Rooms Revenue],[Occupied Room Nights])`	Avg rate per sold room
TRevPAR	`DIVIDE([Total Revenue],[Available Room Nights])`	Total rev / available rooms
Occupancy %	`DIVIDE([Occupied RNs],[Available Room Nights])`	0.00-1.00 format
Net ADR	`DIVIDE([Net Revenue],[Occupied Room Nights])`	True net after channel cost
RevPAR LY	`CALCULATE([RevPAR],SAMEPERIODLASTYEAR(Dim_Date[Date]))`	Same period prior year
RevPAR vs Budget	`DIVIDE([RevPAR]-[Budget RevPAR],[Budget RevPAR])`	% variance vs plan
Forecast Revenue	`[MTD Revenue]+([RevPAR]*[Avail Rooms]*([Days in Month]-[Elapsed Days]))`	Month-end projection

7.2 Profitability Measures

Measure	DAX Formula	Notes
GOP	`[Total Revenue]-[Total Dept Expenses]`	Gross Operating Profit
GOP Margin %	`DIVIDE([GOP],[Total Revenue])`	Target benchmark 35-45%
EBITDA	`[GOP]-[Undistributed Expenses]-[Mgmt Fees]`	Pre-depreciation profit
EBITDA Margin %	`DIVIDE([EBITDA],[Total Revenue])`	Primary ownership metric

Measure	DAX Formula	Notes
GOPPAR	`DIVIDE([GOP],[Available Room Nights])`	GOP per available room
Payroll %	`DIVIDE([Payroll Cost],[Total Revenue])`	Labor cost ratio
Energy Cost %	`DIVIDE([Energy Cost],[Total Revenue])`	Utility burden ratio
Budget Variance ₪	`[Total Revenue]-[Budget Revenue]`	Absolute variance
Budget Variance %	`DIVIDE([Budget Variance ₪],[Budget Revenue])`	% above/below plan
Rolling 12M Revenue	`CALCULATE([Total Revenue],DATESINPERIOD(Dim_Date[Date],LASTDATE(Dim_Date[Date]),-12,MONTH))`	TTM revenue

7.3 Guest & Retention Measures

Measure	DAX Formula	Notes
Repeat Guest Rate	`DIVIDE(CALCULATE(COUNTROWS(Fact_Reservations),Dim_Guest[VisitCount]>1),COUNTROWS(Fact_Reservations))`	% guests who returned
NPS Score	`CALCULATE(DIVIDE(SUM(Fact_GuestFeedback[NPSScore_Promoters])-SUM([Detractors]),SUM([Respondents]))*100)`	Range -100 to +100
Review Score	`AVERAGE(Fact_GuestFeedback[OverallScore])`	All platforms average
CAC	`DIVIDE([OTA Commission]+[Ad Spend],COUNTROWS(Fact_Reservations))`	Cost per booking
LTV Gross	`DIVIDE(SUM(Dim_Guest[TotalLifetimeRevenue]),DISTINCTCOUNT(Dim_Guest[GuestID]))`	Avg gross LTV per guest
LTV Net	`[LTV Gross]-AVERAGE([CAC per guest])`	LTV after acquisition cost
LTV/CAC Ratio	`DIVIDE([LTV Net],[CAC])`	Target > 3x
Cancellation Rate	`DIVIDE(CALCULATE(COUNTROWS(Fact_Reservations),Fact_Reservations[Status]="Cancelled"),COUNTROWS(Fact_Reservations))`	Cancellation frequency

Measure	DAX Formula	Notes
Churn Rate (Loyalty)	`DIVIDE(CALCULATE(COUNTROWS,Dim_Guest[LoyaltyTier]<>BLANK(),Dim_Guest[VisitCount]=1,previousYear),CALCULATE(loyaltyBase))`	Loyalty program churn

7.4 HR & Workforce Measures

Measure	DAX Formula	Notes
Total FTE	`SUM(Fact_HR[FTE])`	Full-time equivalent headcount
Turnover Rate	`DIVIDE(SUM(Fact_HR[Terminations]),AVERAGE(Fact_HR[Headcount]))`	Annualized 12-month
Revenue per Employee	`DIVIDE([Total Revenue],[Total FTE])`	Productivity indicator
Absenteeism Rate	`DIVIDE(SUM(Fact_Payroll[AbsentDays]),SUM(Fact_Payroll[ScheduledDays]))`	Unplanned absence %
Overtime %	`DIVIDE(SUM(Fact_Payroll[OvertimeHours]),SUM(Fact_Payroll[RegularHours]))`	OT as % of regular
Occupied Rooms per LH	`DIVIDE([Occupied Room Nights],[Total Labor Hours])`	Productivity per labor hour
eNPS	`CALCULATE([NPS Score],Fact_GuestFeedback[IsNPS]=1)`	Employee NPS score

7.5 Energy & Sustainability Measures

Measure	DAX Formula	Notes
kWh per Occ Room	`DIVIDE(SUM(Fact_Energy[Electricity_kWh]),[Occupied Room Nights])`	Benchmark: 30-60 kWh
Water per Occ Room	`DIVIDE(SUM(Fact_Energy[Water_Liters]),[Occupied Room Nights])`	Benchmark: 150-250L
Carbon tCO2e	`(SUM([Electricity_kWh])*0.0006)+(SUM([Gas_m3])*0.00204)`	Scope 1+2 estimate
Energy vs Benchmark %	`DIVIDE([kWh per Occ Room]-[Industry kWh Benchmark],[Industry kWh Benchmark])`	Negative = more efficient
Utility Cost %	`DIVIDE([Energy Cost],[Total Revenue])`	Energy burden on revenue

8. Advanced Power BI Features

8.1 Bookmarks — Saved Views

Bookmark	Audience	What it shows
CEO View	CEO, Owner	Executive Summary with Board Pack mode — no operational detail
CFO View	CFO, Finance	Finance & Cash + P&L side-by-side, budget variance highlighted
COO View	COO, GM	Revenue + Operations screens, SLA compliance prominent
GM Daily	General Manager	Daily flash: Occupancy today, arrivals, complaints, staff alerts
Board Pack	Board Members	Simplified view — only 6 top KPIs + trend, PDF-ready
Revenue Mode	Revenue Manager	Rate calendar + pace + pickup — no financial detail

8.2 Scheduled Subscriptions

- Daily Flash (06:30): Occupancy, RevPAR, alerts → GM + Department Heads via email + mobile push
- Weekly GM Pack (Monday 08:00): All screens summary → GM, Revenue Manager, CFO
- Monthly Executive Pack (1st of month): Board-pack bookmark → Owner, CFO, Board as PDF
- STR Benchmark Report (Tuesday 09:00): Competitive set comparison → Revenue Manager, GM

8.3 Data-Driven Alerts (Threshold-Based)

- RevPAR < 85% of monthly budget → Alert to GM + Revenue Manager
- Occupancy < 60% for 3 consecutive days → Alert to GM + Revenue Manager
- Review score < 8.0 on any platform → Alert to Guest Relations + GM
- Energy consumption >20% above baseline for any zone → Maintenance + GM
- Payroll % > 38% of revenue → Alert to CFO + HR Director
- Cash balance < defined covenant threshold → CFO + Owner
- OOO rooms > 5% of inventory → Maintenance + Revenue Manager

8.4 What-If / Scenario Analysis Parameters

- Price Slider: ADR ±20% → impact on RevPAR, Revenue, EBITDA
- Occupancy Slider: Occ% ±10pp → impact on Revenue, Labor productivity
- Commission Rate Slider: OTA % varies → net revenue impact per channel
- Energy Cost Slider: utility rate ±15% → impact on EBITDA margin
- Payroll Growth Slider: salary increase % → Payroll % of Revenue impact

8.5 Action Layer — Insight to Action

Every anomaly or alert is linked to an Action Table containing:

Field	Type	Example	Source
Task Description	Free text	*Adjust OTA rate for next weekend*	Revenue alert trigger
Owner	Employee lookup	*Revenue Manager*	Alert-based assignment
Due Date	Date picker	*3 days from trigger*	Rule-configured
Expected Impact	Calculated	*+₪45K RevPAR recovery*	Model estimate
Status	Dropdown	*Open / In Progress / Done*	Manual update
Linked KPI	Measure reference	*RevPAR variance*	Auto-linked

9. Technical Architecture & Data Pipeline

9.1 Medallion Architecture — Three Layers

Layer	Name	Contents	Technology
Bronze	**Raw Ingestion**	Source data as-is — no transformation. Full history preserved.	Azure Data Lake / OneLake
Silver	**Standardized**	Cleaned, typed, deduplicated. GDPR masking applied here.	Dataflow Gen2 / Spark
Gold	**Business Marts**	Star Schema Fact + Dim tables ready for Power BI consumption.	Azure SQL / Fabric Lakehouse

9.2 Data Source Integrations

System	Examples	Connection	Refresh
PMS	Opera, Maestro, Protel, RoomRaccoon, Cloudbeds	REST API / SQL	Real-time/15min
POS (F&B)	Micros, Infrasys, JETZT, TouchBistro	SQL / REST API	Hourly
Channel Manager	SiteMinder, RateGain, Lodgify	REST API	Daily
ERP / Accounting	Priority, SAP B1, Sun Systems, Oracle	SQL / REST API	Daily 05:00
CRM / Loyalty	Salesforce, HubSpot, custom	REST API	Daily
HR / Payroll	HilaBase, BambooHR, Bob, Comeet	REST API / CSV	Daily
BMS / IoT Energy	Schneider, Honeywell, custom meters	MQTT / REST API	Hourly
Review Platforms	TrustYou, Revinate, Booking.com API	REST API	Hourly
STR Benchmarks	STR Global, OTA Insight	SFTP / API	Weekly
Marketing	Google Analytics 4, Meta Ads API	REST API	Daily
Zimmer / Glamping	Lodgify, Smoobu, Guesty, Hostaway	REST API	Daily
Booking Engine	Siteminderbook, Profitroom, SynXis	REST API	Real-time

9.3 Refresh SLA

Screen / Domain	Refresh Cadence	Notes
Executive Command Center	Every 30 minutes	DirectQuery on PMS for live occupancy
Commercial & Revenue	Every 15 minutes	PMS rate + pickup data
Finance & Cash	Daily at 05:00 + intraday	ERP batch + live bank feed
Workforce & HR	Daily at 06:00	HR system nightly sync
Energy & Sustainability	Hourly	IoT meter data via BMS API
Guest Feedback	Hourly	Review platform webhooks + batch
Procurement & Inventory	Daily at 04:00	ERP purchase order sync
STR Benchmarks	Weekly (Tuesday)	STR/OTA Insight file delivery

10. Security, Access & Data Governance

10.1 Row-Level Security (RLS) Roles

Role	Data Scope	DAX Filter (Dim_Property)	Salary Data
Corporate / Owner	All properties, all data	*All rows visible*	Full access
Regional Manager	Properties in their region	*RegionManagerID = CURRENTUSER()*	Salary band only
General Manager	Single property only	*GMEmail = USERPRINCIPALNAME()*	Own property only
Department Head	Own department rows	*Dept RLS + Property filter*	No salary data
Revenue Manager	Revenue/Inventory data only	*Screens 1-4 only*	No
Finance Only	Financial GL + Budget	*All properties (read)*	No payroll detail
HR Restricted	HR data + Payroll	*Own property*	Full payroll — own dept
Analyst / Viewer	Specific screens only	*Per deployment config*	No

10.2 Sensitive Data Classification

- Salary & Bonus: HR Restricted role only — masked for all other roles
- Personal Guest Data: GDPR-compliant anonymization in Silver layer — no PII in Power BI
- Contract Values: Finance Only + Corporate roles
- Management Financial Data: Corporate + GM (own property) only
- Employee Performance: HR Director + line manager (own reports) only

10.3 Governance Framework

- Naming Convention: [Domain - Measure Name] e.g. [REV - RevPAR MTD]
- Single Source of Truth: Certified Datasets badge on all production datasets
- Metric Definitions: Published KPI Dictionary reconciled with Finance monthly
- Change Log: All measure changes tracked in Azure DevOps with approval workflow
- Dataset Certification: Data Owner sign-off required before promotion to PROD

11. Implementation Roadmap

11.1 Phase 1 — MVP (Weeks 1–8)

Screens: Executive Command Center, Commercial & Revenue, Finance & Cash, Profitability & P&L, Basic Marketing
Features: Bookmarks (5), Email Subscriptions (3), Core Alerts (5), Mobile Layout
Data: PMS, ERP, Channel Manager, Manual Budget Upload

11.2 Phase 2 — Full Operations (Weeks 9–16)

Screens: Operations & Guest Experience, Procurement & Inventory, Workforce & HR, Energy & Sustainability
Features: Drillthrough pages, Tooltip pages, What-if sliders, AI Smart Narratives
Data: HR System, IoT/BMS, Review Platforms, Procurement System

11.3 Future State — AI & Intelligence Layer (Month 6+)

AI Features: Anomaly Detection, 90-day Revenue Forecast, Key Influencers, Decomposition Tree
Prescriptive: Action Engine with recommended actions + expected impact
Advanced: Scenario Simulation, External Benchmarking (STR), Multi-currency FX hedging tracker

11.4 Project Phases — Detailed Timeline

#	Phase	Key Activities	Duration
0	**Discovery**	Stakeholder interviews, data source audit, PMS/ERP credentials, KPI prioritization workshop, RLS mapping	**1–2 weeks**
1	**Data Layer**	Source connections, ETL/Dataflow setup, Star Schema build, Dim_Date load, RLS configuration, Gateway setup	**2–3 weeks**
2	**Measure Library**	All 170+ DAX measures, validation vs PMS reports, budget variance testing, time intelligence QA	**1–2 weeks**
3	**Dashboard Build**	All 10 screens in DEV workspace, custom visuals, bookmarks, tooltips, drill-through, mobile layout	**3–4 weeks**
4	**UAT & Training**	User acceptance testing, training sessions per role (6 sessions), subscription setup, alert configuration	**1–2 weeks**
5	**Go-Live**	PROD deployment, monitoring, 30-day hypercare, usage analytics review	**1 week + ongoing**

12. Summary & Recommendations

12.1 Core Conclusion

The DEEPLY Hospitality Executive Dashboard succeeds when it combines all six measurement layers into a single coherent management system: classic hotel KPIs, universal business metrics, profitability analytics, customer retention economics, operational efficiency, and people + energy intelligence.

12.2 The DEEPLY Differentiation Principle

Data → Insight → Financial Impact → Recommended Action

The flywheel that separates DEEPLY from any other BI dashboard in hospitality

12.3 Immediate Next Steps

- Confirm property type scope and activate relevant screen configuration
- Audit data source availability: PMS API credentials, ERP access, review platform API keys
- Map GL accounts to USALI Chart of Accounts (Finance sign-off required)
- Configure RLS user table with Azure AD emails and role assignments
- Load initial Dim_Budget table from current year finance plan
- Schedule Discovery workshop with GM, CFO, and Revenue Manager

deeply Hospitality Executive Dashboard
